

A Donaldson Company

A WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

V 1000 iQ **ELECTRONICS**

High volume extraction for hand and machine soldering applications.

BOFA's V 1000 iQ high end extraction system combines extremely large filter capacity with high airflow and pressure rates, making it the ideal choice for heavy duty applications that generate large amounts of particulate and gaseous organic compounds. This unit can cater for up to 15 operators (dependent on installation) as a centralised system or can be used to extract fumes from automated soldering machines.

Performance has now been further enhanced with the inclusion of several new features. including BOFA's iQ Operating System, making the new V1000 iQ one of the most advanced systems available.

The iQ system takes performance and safety parameters to a new level and ensures that maintenance, downtime and ownership costs are kept to a minimum.

More information about the Intelligent Operating System (iQ).

Technical data

	EU	US
Dimensions (HxWxD)	1205 x 615 x 790mm	47.44 x 24.21 x 31.10"
Cabinet construction	Brushed stainless steel / Powder coated mild steel	Brushed stainless steel / Powder coated mild steel
Airflow / pressure	850m³/hr / 100mbar	500cfm / 100mbar
Electrical data	230v Single-phase 1~ 50/60Hz Full load current: 12.8 amps / 2.2kw	115v 60/50Hz Full load current: 19.5 amps / 2.2kw
Noise level	< 63dBA (at typical operating speed)	< 63dBA (at typical operating speed)
Weight	146kgs	321.88lbs
Approvals	UKCA and CE	UKCA, CE, cUL, UL*

DeepPleat DUO pre-filter specifications

Surface media area	30m² approx (322.8ft²)	
Filter media	Borosilicate	
Filter media construction	Maxi Pleat construction with glue bead spacers	
Filter housing	Zintec mild steel	
Filter efficiency	F8 (95% @ 0.9 microns)	
Inlet size	125mm	
Dropout chamber size	58 litres	
Filter media pleat size	200mm	

Combined HEPA / gas filter specifications		
Surface media area	7.5m² approx (80.7 ft²)	
HEPA filter media	Borosilicate	
HEPA media construction	Maxi pleat construction with glue bead spacers	
Filter housing	Zintec mild steel	
Treated activated carbon	34kgs (74.8 lbs)	

Combined HEPA / gas filter specifications

Filter efficiency

99.997% @ 0.3 microns

Datasheet correct at time of publishing.

Where applicable, the carbon used in BOFA units is capable of removing a wide range of VOC's, however it is the responsibility of the user to ensure the carbon is suitable for their application. For specific applications, please contact us for details.
