- **Lézer fej / Laser Cutting Head RayTools BM109**

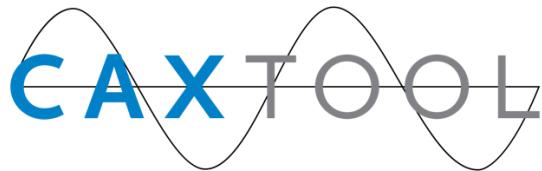

The BM109 series is an automatic focusing fiber cutting head released by Swiss RAYTOOLS AG in 2017. The product is equipped with external servo motor and internal driver units, which can drive the focus lamp to change position automatically in the range of about 17mm by linear mechanism. Users can continuously focus through setting program to finish the rapid perforation of thick plates and the automatic cutting of plates of various thickness and materials. The product can be equipped with D28 composite lens group to integrate the beam, and equipped with QBH interface with fiber laser; optimized optical and water-cooled design allows the laser head to work under low and medium power steadily for a long time

- **Cooling SystemS&A CWFL-1500**

S&A brand CWFL-1500 water chiller is specially applied to cool the fiber laser and optic lenses at the same time, multiple use for saving cost, space and manual move, quite convenient for the user.

S&A industrial water chiller has 2 temperature control modes as constant temperature and intelligent temperature control. Under intelligent mode, the water temperature is adjusted according to ambient temperature. You do not need to worry about the water temperature adjustment of seasonal changes.

For example, oxygen helps to cut faster and thicker; nitrogen helps to get brighter cutting edge.

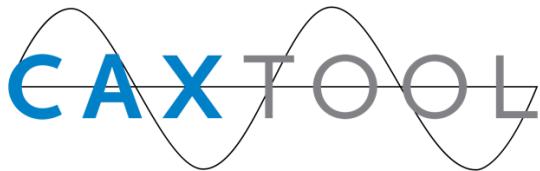

The solenoid valve controls the gas blowing. Gas blows only during cutting, which saves your gas cost. SMC proportional valve controls the gas pressure and brings good cutting all the time, for example, gas pressure is lowered when cutting corners.
